

ASTRA · TECHZ

— AI-ENABLED · AGENTIC · BUILT FOR SMES

Building for SMEs, an AI-enabled, *agentic future.*

We consult, we build, and we close deals. Astra Techz becomes the technology team that small and medium businesses never had — partners, not vendors.

— WHY NOW

The agentic era won't wait for SMEs to *catch up*.

NO 1 · REACH

Enterprise-grade AI is finally within reach — but it demands a team that can wield it.

NO 2 · CAPACITY

Most SMEs don't have a CTO — let alone an AI strategy or the talent to ship one.

NO 3 · SPEED

The gap between businesses that adopt and those that don't is widening fast.

Astra Techz exists to close that gap — bringing fractional CTO ownership and agentic engineering to the businesses that need it most.

— WHAT WE ARE

Your tech team. *Partners*, not vendors.

We don't bill hours and disappear. We embed, we own outcomes, and we bring an unprecedented innovation mindset — the latest stack, models and frameworks — to every engagement.

01

We consult

Fractional CTO leadership, AI & agentic strategy, architecture and roadmap.

02

We build

Production engineering across web, mobile, AI agents, computer vision and data.

03

We close deals

Pre-sales engineering and deal-closing that turns capability into signed contracts.

— BY THE NUMBERS

Seven years of shipping. A bench built for scale.

WHERE WE SHIP

• AI AGENTS & LLM INTEGRATIONS

• WEB APPLICATIONS

• NATIVE MOBILE APPS

• COMPUTER VISION

• DATA & DASHBOARDS

— WHO WE PARTNER WITH

Three kinds of builders. One *engine* behind them.

A

Small & Medium Businesses

Your fractional tech team.

CTO ownership, engineering resources and an innovation mindset — without building it in-house.

B

Developer Teams

Your consulting + sales arm.

Pre-sales engineering and deal-closing that turns your technical talent into signed contracts.

C

Solo Entrepreneurs

Your engineering powerhouse.

Guidance on the latest stack and models — and the muscle to make prototypes scale.

We become your *tech team*.

Fractional CTO ownership, real engineering resources, and an innovation mindset that treats your business like our own. You get the capability of a deep-tech company — without the cost of building one.

01 **Fractional CTO ownership** — strategy, architecture and roadmap, led by senior operators.

02 **Engineering resources on tap** — design, build and ship without hiring a department.

03 **An innovation mindset** — we bring the agentic stack to problems you didn't know were solvable.

04 **Partners, not vendors** — aligned to your outcomes, in the room when it matters.

Your consulting + *sales arm.*

Astra Techz is the pre-sales engineering and deal-closing partner that turns your technical talent into signed contracts — anywhere on the globe. We get paid when you get paid.

01 **Unparalleled pre-sales engineering** — we shape the solution and prove it.

02 **Consulting + sales arm** — we open the rooms and run the pitch.

03 **We get paid when you get paid** — aligned entirely to outcomes.

04 **Global reach** — close deals across markets you couldn't reach alone.

Your engineering *powerhouse.*

Focus on the core business. We guide you through the latest stack, model innovations, frameworks and possibilities — and make sure your prototypes scale as you grow.

01 **Latest stack & models** — guidance on what to build with, and why.

02 **Frameworks & possibilities** — we keep you on the frontier, not behind it.

03 **Prototype to production** — we make sure what you ship survives scale.

04 **You stay on the business** — we carry the engineering.

We consult. We build. We *close*.

01 · Consult

Fractional CTO & AI strategy

We sit at the table as your technology leadership — setting agentic strategy, architecture and roadmap, and making the build-vs-buy calls that compound.

02 · Build

End-to-end engineering

Production software across web, mobile, AI agents, computer vision and data — shipped by a senior bench, not learned on your dime.

03 · Close

Pre-sales & deal closing

For partner teams, we turn capability into contracts — shaping the pitch, proving it with prototypes, and carrying it to signature.

One engine, three motions — so a business can strategize, ship and sell without assembling three separate teams.

An agentic toolkit, deployed end-to-end.

01

AI Agents & LLM Integrations

Autonomous workflows, copilots and retrieval systems built on frontier models.

02

Web Applications

Modern, scalable web platforms — from MVP to production-grade systems.

03

Native Mobile Apps

iOS and Android experiences engineered for performance and reach.

04

Computer Vision

Detection, recognition and inspection pipelines for real-world data.

05

Data & Dashboards

Pipelines, analytics and decision surfaces that turn data into action.

06

Design & Solution Thinking

Product strategy and UX that make the technology usable and the bet sound.

Low friction to start. High conviction once we ship.

PHASE 01

Discover

Understand the business, the goal, and where technology moves the needle.

PHASE 02

Architect

Set the strategy, the stack and a roadmap with clear, costed milestones.

PHASE 03

Build & Ship

Engineer in tight loops, ship working software, prove it in the real world.

PHASE 04

Scale

Harden, grow and extend — as a standing partner, not a one-off vendor.

Start small with a scoped engagement. Grow into a full technology partnership once we've shipped together.

— LET'S BUILD IT

Let's build your *agentic* future.

Whether you're an SME, a developer team, or a solo founder — Astra Techz is the technology partner that consults, builds, and closes.
